PROFILE

Ambitious undergraduate in Networking and Mobile Computing at Horizon Campus, with experience in building secure and scalable full-stack applications. Skilled in React, Node.js, and cloud deployment, achieving measurable improvements in system performance and usability. Passionate about applying analytical problem-solving and innovative thinking to deliver impactful digital solutions.

WORK EXPERIENCE

- **Freelance Web & Mobile Developer** (2025 – Present)
 - Delivered 5+ custom websites and mobile applications for clients.
 - Built full-stack solutions with React, Node.js, Firebase, and Mongo Db, ensuring scalability and performance.
 - Improved website load time by up to 35% and reduced bounce rate through UI/UX enhancements.

SKILLS

- **Programming:** Java, JavaScript, Python, PHP, HTML, CSS
- **Frameworks & Libraries:** React, React Native, Node.js, Tailwind CSS, Framer Motion, Shadcn
- **Databases:** PostgreSQL, MySQL, MongoDB Atlas (SQL & NoSQL)
- **Web & API Development:** RESTful APIs, FastAPI, Firebase Auth
- **Mobile Development:** Android (Java, Kotlin), React Native
- **Cloud & Deployment:** AWS, Netlify, Vercel
- **Tools:** Git, GitHub, Postman, Figma
- **Languages:** Tamil, English
- **Soft Skills:** Communication, Leadership, Project Management, Teamwork, Problem-solving, Critical Thinking

EDUCATION

- **BIT (Hons) in Network & Mobile Computing** – Horizon Campus (Ongoing)
- **Diploma in Web Development** – STUDYZ Academy (Ongoing)
- **A/L in Engineering Technology** – Methodist Central College, Batticaloa (2020)

ACHIEVEMENTS & CERTIFICATIONS

- **Frontend Developer (React)** – HackerRank *Jul 2025*
 - Certified in React.js frontend development.
- **Career Essentials in Generative AI** – Microsoft & LinkedIn *Jan 2025*
 - Gained expertise in Generative AI, responsible AI, and business applications.
- **Introduction to Cybersecurity** – Cisco *Jan 2025*
 - Covered cybersecurity fundamentals, network protection, and online threats.
- **Web Development** – University of Moratuwa *Dec 2024*
 - Completed structured training in full-stack web development.

PROJECTS

Zero Hunger Mobile App *Android Studio, Java*

- Mobile app connecting food donors with communities in need to reduce waste (SDG Goal 2).
- Implemented real-time map, donation/request system, and secure authentication.
- **GitHub:** Zero Hunger Mobile App

Sri Lankan Academic Risk Prediction System *Python, Streamlit, Scikit-learn*

- Web app predicting students at risk of academic failure in Sri Lankan schools.
- Achieved 82% accuracy using ML models trained on 1,500+ student records.
- Provided probability visualization, feature importance, and intervention suggestions.
- **GitHub:** Academic Risk Prediction System

School Management System *Java, JavaFX, MySQL*

- Desktop application automating school operations (student/staff management, marks, results).
- Designed intuitive UI, reducing manual admin workload by 40%.
- **GitHub:** School Management System

React Front-End Projects

React, TypeScript, Tailwind CSS

- **E-Commerce App:** Implemented product listings, shopping cart, and modular components.
- **Smart Review Filter:** Built dynamic system for categorizing product reviews.
- **30 Days React Challenge:** Completed 30+ React projects to master state management, hooks, reusable components, and API integration.
- **GitHub:** E-Commerce App — Smart Review Filter — 30 Days React Challenge

QuickCart – React Native E-Commerce App

React Native, Node.js, MongoDB

- Mobile e-commerce app developed for hackathon participation.
- Designed seamless shopping experience with intuitive navigation.
- Built Node.js API for backend operations and secure payment transactions.
- **GitHub:** API — Mobile App
