SIVASUTHAKARAN SANJEEV

Associate Product & AI Engineer

94 753 883 167 | sanjaysanjeev2000@gmail.com | Portfolio | LinkedIn | git hub.com/sanjeev200009 | Colombo, Sri Lanka

SUMMARY

Associate Product & AI Engineer and full-stack developer building production systems across web, cloud, and AI. At Career141, progressed from Web Developer Intern to Associate Product & AI Engineer and delivered an AI recruitment pipeline processing 115,000 profiles, a custom email platform that cut costs by 78%, a Next.js website rebuild, and WhatsApp automation tools. Strong across Next.js, React, Node.js, AWS, Cloudflare, Supabase, Convex, and LLM- powered workflows.

EXPERIENCE

AssociateProduct & AI Engineer

Career141

08/2026 - Present | Colombo, Sri Lanka

career141.com

Global Executive Search & Recruitment Platform

•Promoted from Web Developer Intern to Associate Product & AI Engineer in recognition of outstanding technical contribution, innovation, and future leadership potential; enrolled in Career141's Fast Track Technology Leadership Programme (FTTLP)

•Continuing ownership of the AI-powered 13-stage CV recruitment pipeline 115,000candidate profiles, 8 autonomous agents), driving the next phase of platform development as part of the newly formed Product & AI Engineering track

•Deepening Convex backend integration with the Next.js application layer - extending real-time data sync, webhook handling, and hot-storage workflows across the recruitment pipeline and candidate-facing tools

•Building automated WhatsApp follow-up sequences on the Meta WhatsApp Cloud API - event-triggered candidate nudges layered on top of the existing Day 2/4/7 follow-up system, with delivery and read-status tracking

•Developing a custom AI voice call agent for candidate outreach using a Whisper (speech-to-text) LLM GPT-4o) TTS (text-to-speech) pipeline - enabling automated, conversational phone outreach as an extension of the pipeline's IVR stage

•Evaluating additional reference architectures and third-party voice-AI approaches tobenchmark against the custom pipeline for latency, cost, and conversation quality

Web Developer Intern

Career141

01/2026 - 07/2026 | Colombo, Sri Lanka

career141.com

Global Executive Search & Recruitment Platform

•Redesigned career141.com from a malware-attacked WordPress site into a fully customNext.js application 50 pages) using Supabase, Framer Motion animations, JWT auth, and Cloudflare Pages deployment - saving the client $500 rebuild cost

•Led Career141.com v2 rebuild: Next.js 15 TypeScript Tailwind CSS Cloudflare R2 CDN with advanced animated sections (rotating spotlight carousel, trigonometric elliptical carousel, 3D parallax ExecutiveHero, equirectangular world map pins) and headless WordPress backend WPGraphQL Yoast) for SEO; integrated OpenAI-powered customer support chatbot

•Architected a 13-stage AI-powered CV recruitment pipeline with 8 autonomous agents managing 115,000 candidate profiles across 7 ingestion channels WhatsApp, LinkedIn, Email, Workable, Bulk Upload, Meta Ads, Headhunting) - AWS API Gateway Node.js Convex DB BullMQ

•Built MailGrid, a full white-label email CRM replacing Brevo: AWS SES SNS Express.js Prisma MariaDB handling 84,085 contacts with bulk campaign dispatcher, real-time delivery telemetry, and one-click unsubscribe - reducing email costs from $229/mo to $50/mo 78% saving)

EDUCATION

BIT(Hons)inNetworking & Mobile Computing

Horizon Campus, Malabe

•Reading - In Progress

G.C.E. Advanced Level - Engineering Technology

Methodist Central College, Batticaloa

SKILLS

Frontend

Next.js 15 | React.js | React Native | Tailwind CSS | Framer Motion | Shadcn/UI | Vite | Webflow (components)

Backend

Node.js | Express.js | FastAPI | RESTful APIs | Agentic AI Workflows

Databases

PostgreSQL | MySQL | MongoDB Atlas | TiDB Serverless | MariaDB | Prisma ORM | Supabase | Convex

Cloud & Infra

AWS SES, SNS, API Gateway, S3, IAM, Lambda)

Cloudflare Pages, R2, Workers, DNS, Tunnels)

Vercel | Netlify

Realtime & Queue

Convex DB | BullMQ | Upstash Redis | Firebase Realtime DB | WebSockets

•Developed WhatsApp bulk messaging automation system using Meta WhatsApp Cloud API Meta developer account setup, phone number provisioning, Python PostgreSQL backend, Next.js UI for campaign management and bulk message scheduling

•Engineered 10 cross-client HTML email templates Gmail/Outlook compatible, CAN- SPAM/PDPA compliant) from Figma designs for Career141 and TRUGIFTS corporate gifting client; migrated from Brevo to custom AWS SES platform

•Built Hercules WhatsApp CV intake system using Meta WhatsApp Cloud API Convex webhook backend for real-time candidate file processing

•Implemented two-tier storage: Convex DB 30-day hot storage) MinIO on-premise S3-compatible cold archive with nightly 2AM automated migration via Cloudflare Tunnel

EXPERIENCE

MobileApplication Development Trainee

Softwareplus Pvt Ltd

2024 - 2024 Colombo, Sri Lanka

• Developed production-ready React Native, Java, and Kotlin features for ERP, LMS, and inventory management systems across iOS and Android platforms.

•Participated in Agile code reviews, debugging, and QA ensuring release-quality mobile deliverables

Freelance Full-Stack Developer

2022 - Present Remote, Sri Lanka

•Delivered 5 custom websitesand mobile applications for clients across business, interior design Naflan Farvis portfolio), eco-tourism, and personal branding domains

•Full-stack solutions with React, Node.js, Firebase, MongoDB; improved client website load times by up to 35% through caching, asset optimization, and UI/UX enhancements

PROJECTS

Career141.com — Website Rebuild (v1)

LIVE career141.com

•Rebuilt malware-attacked WordPress site entirely in Next.js 15 50pages, full Supabase backend, job board with recruiter admin panel RBAC , and Cloudflare Pages deployment. Saved client $500 vs agency quote

•Implemented job listings with publish/draft/close states, candidate application forms CV email delivery via Brevo), testimonials CMS, blog, 14 industry pages, and AI chatbot OpenAI API answering visitor queries in real time

•Assigned existing career141.com domain to new Cloudflare-deployed Next.js system seamlessly

Career141.com v2 — Advanced Website Rebuild

LIVE career141.comv2

•Next-generation rebuild with complex animated sections: rotating spotlight carousel DifferentiateSection), trigonometric elliptical carousel IndustriesSection), 3D parallax hero ExecutiveHero), Tinder-style CountryStack cards, world map with corrected equirectangular projection pins

•Headless WordPress backend WPGraphQL Yoast SEO for content team SEO management; Cloudflare R2 CDN (cdn.career141.com) for all media assets

•OpenAI-powered customer support chatbot; Clerk authentication;migrated from @cloudflare/next-on-pages to @opennextjs/cloudflare adapter for production stability

KEY ACHIEVEMENTS

Emailinfrastructurecost reduction

replaced Brevo $229/mo) with custom AWS SES platform $50/mo) built from scratch for Career141
78%

PROJECTS

Career141AIRecruitment Pipeline — CV Processing System

•13-stage fullyautomated pipeline: CV ingestion AI parsing GPT-4o-mini, 13 fields, confidence scoring) SHA-256 4-factor deduplication → vector semantic search across 115,000 profiles 11-stage recruiter pipeline Day 2/4/7 follow-up email sequences AI phone outreach IVR CV prep/submission → interview management → offer/placement → analytics

•7 ingestion channels: WhatsApp Meta API , LinkedIn shared inbox, bulk upload (up to 600 CVs), email campaign inboxes, Workable webhook, Meta paid campaign line, manual headhunting — all unified at AWS API Gateway

•8 autonomous AI agents running 24/7 CV Parsing, Candidate Matching,Follow-Up Email, WhatsApp Monitor, AI Phone Call IVR , Deduplication, Email Monitor, Pipeline Health. Lazy parsing fires only on first recruiter view — cutting bulk AI costs 90%

•Two-tier storage: Convex DB 30-day hot) MinIO on-premise coldarchive (nightly 2AM migration via Cloudflare Tunnel). Monthly AI cost as low as $2 (budget stack) or $20 (balanced production)

MailGrid — Custom Email Platform (Brevo Replacement)

•Engineered a full white-label email CRM from the ground up, supporting 84,085+ contacts and scaling toward 250,000+; developed a high-throughput bulk campaign dispatcher, real-time delivery tracking (opens, clicks, bounces, and complaints) via Amazon SNS webhooks, JWT-secured one-click unsubscribe, and List-Unsubscribe headers.

•Replaced Brevo $229/mo) with AWS SES at $0.10/1,000 emails - $50/mo for 6 blast campaigns across full list 504,510 emails). 78% monthly cost reduction. Zero per-contact storage fees at any scale

•AWS SES domain verification, SPF/DKIM/DMARC on Cloudflare DNS, IAM policies, SNS topic, configuration set with all event types. Full CRM UI Contacts, Lists, Campaigns, Templates, Analytics

WhatsApp Bulk Messaging Automation System

•End-to-endWhatsApp broadcast system:Metadeveloper account setup,phone number provisioning, webhook configuration, and template message management via Meta Cloud API

•Python backend for bulk message scheduling and delivery tracking;PostgreSQL for contact and campaign storage; Next.js UI for campaign creation, audience selection, and analytics

•Supports template-based broadcasts, delivery status tracking, and opt-out management — built for Career141's candidate outreach campaigns

Talent Unwrapped / Voice of Talent — Podcast Platform

LIVE talentunwrapped.career141.com

•Full-stack podcast broadcasting platform with Episode, Speaker, and Reel content management. Edition-based structure supporting multiple regional shows Dubai, Singapore)

•Admin panel with soft-delete (archive) mechanism preserving all historical data; RESTful API serving frontend episode/speaker/highlight clip data

•Node.js Express backend with PostgreSQL/Supabase; Cloudflare deployment; cross-device responsive frontend

Talex Awards Platform — AI Candidate Ranking System

•Multi-pageawardsplatformwithAI-poweredcandidate scoring 0 100 against weighted criteria: Innovation 30%, Impact 35%, Sustainability 20%, Leadership 15%

•Candidates register, pay via PayHere, upload presentation PDF/PPT up to 50MB and video MP4 up to 500MB to Cloudflare R2; AI extracts structured fields via NLP and scores automatically

•Full backend complete: user registration, payment processing, file upload, AI ranking engine, admin dashboard with score breakdowns and CSV export. Frontend paused; resuming shortly

KEY ACHIEVEMENTS

Candidateprofiles managed in AI recruitment pipeline with semantic vector search and 8 autonomous AI agents running 24/7

115,000

CV ingestion channels unified into a single automated pipeline WhatsApp, LinkedIn, Email, Workable, Bulk, Meta Ads, Headhunting)

7

End-to-end automated recruitment pipeline from CV intake through AI parsing, matching, outreach, review, interview, to placement

13 Stages

Active contacts managed in custom email CRM with bulk campaign dispatch capability of 504,510 emails/month

84,085

Next.js website rebuilt from malware-attacked WordPress system in full - saving client $500 vs agency rebuild cost

50 Pages

Website load time improvement achieved across client projects through asset optimization and caching strategies

35%

Production HTML email templates built from Figma designs - cross-client compatible Gmail, Outlook, Yahoo)
